AcroBelt Table of End Fitting Types

Revised April 2003

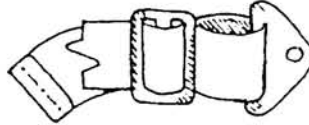

Select the end fittings that best fit your aircraft and enter the corresponding number in the blanks on the order form.

Basic End Fittings

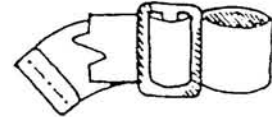

These can be used for the shoulder, lap, and crotch straps.

1

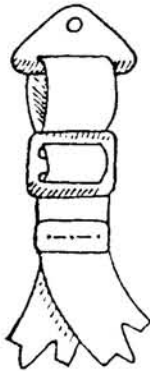

1B

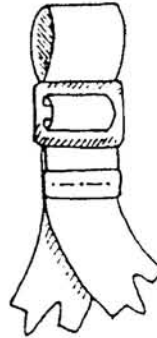

2

"Y-type" Shoulder Harnesses

These fittings are used when only one attach point for the shoulder harness exists.

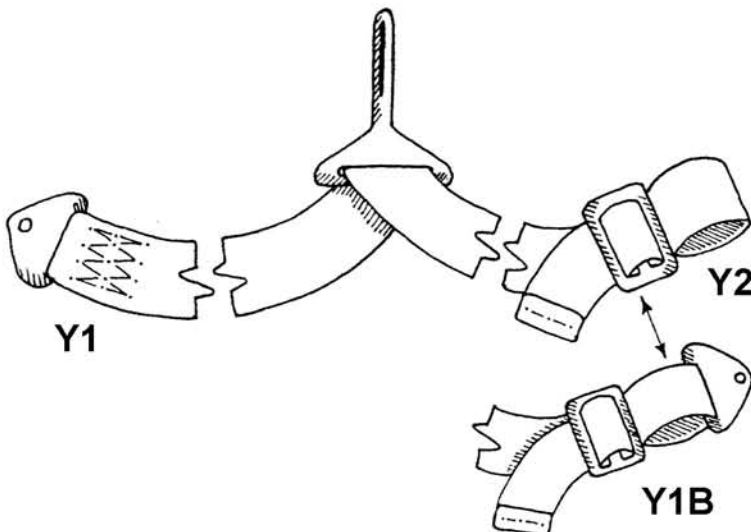

1A

2A

"Y-type" Crotch Strap

This is typically used in gliders where there is no single attach point for a crotch strap.

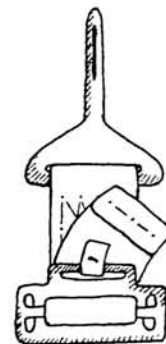

Y1

Y2

Y1B

Adjuster Only

This fitting is used in some Pitts aircraft
